### **Rule changes All Divisions: Helmet face shield must be down during competition run.**

Helmet face shield (visor) down = completely closed, NOT 1 cm open to prevent fogging or to listen to the engine sound.

To prevent fogging there are: anti fog sprays, anti fog wipes for glasses, anti fog inserts, the pinlock etc.

The engine sound is also present with the visor down,

Rule update to be effective immediately.

If you have any questions on this rule update please contact us.

On behalf of the ETPC Tech & safety Board

Willem Wempe
